## WHEN TO GO:

Mexico is in northern hemisphere so seasons are opposite to ours, however there is no wrong time to visit. The hottest time of year is May-Sep (particularly on the coast) and it gets cooler and dry from Oct-Apr. It's also important to note some of the festivals and public holidays, such as: Mexico Independence Day (15th September), the Day of the Dead (2nd Nov), Easter, and the Virgin of the Guadalupe Day (12th Dec).
